

Michael Fleck

Software Engineer | Data & Platform Development | SQL & Python
(832) 859-7883 | michael.j.fleck@gmail.com

SUMMARY

Software engineer developing automated workflows and platform features using Python, SQL, APIs, and cloud infrastructure. Built systems that reduced manual processes and improved reliability across enterprise financial platforms.

SKILLS

- **Language & Databases:** Python (pandas), Javascript, SQL (BigQuery, MySQL, PostgreSQL)
- **Data Engineering:** Apache Airflow (Composer), ETL / ELT Pipelines, Data Modeling, Schema Design, Data Validation/Migration
- **Cloud & Infrastructure:** GCP: BigQuery, Cloud Storage, Cloud Functions, IAM, Terraform
- **Web & Application Development:** React, Next.js, Angular, Node.js, HTML, CSS, TailwindCSS
- **DevOps & Tools:** REST APIs, Git, CI/CD, Agile, Unit Testing (Karma, Jasmine)

PROFESSIONAL EXPERIENCE

Paradane

Sep 2025 - Jan 2026

Web Developer - Contract

Charlotte, NC

- Developed a responsive business landing page using Next.js, React, and TailwindCSS, focusing on performance optimization and modern UI patterns
- Engineered reusable UI components including navigation, service cards, and responsive layouts supporting mobile & desktop devices
- Implemented smooth scrolling interactions and dynamic UI behaviors to enhance user engagement and site usability
- Applied Next.js image optimization and SEO best practices to improve site performance and search visibility

Infosys

July 2022 - Feb. 2025

Software Engineer contracted to Wells Fargo

Charlotte, NC

- Led integration of data from Splunk and MySQL systems into Tableau reporting dashboards, implementing SQL logic for transformation and validation
- Performed SQL-based reconciliation across multiple systems to investigate discrepancies and maintain data integrity
- Collaborated with cloud governance teams to provision service accounts, IAM permissions, and Terraform infrastructure supporting secure system access
- Improved application reliability by implementing unit testing frameworks (Karma/Jasmine) supporting release governance and CI/CD deployment pipelines
- Designed and implemented automated data workflows and processing pipelines using Python, SQL, and Airflow
- Translated business and reporting requirements into SQL queries, automated workflows, and backend logic supporting internal analytics platforms
- Partnered with engineering and platform teams to troubleshoot data pipeline failures and system issues in production environments

Magnum Forge

Jan. 2020 - Aug. 2021

Analyst

Houston, TX

- Built 15+ SQL views and SSRS reports and various queries to support and streamline financial tracking after ERP implementation
- Developed Python (pandas) scripts to transform and validate 10K+ ERP records during system migration, ensuring 99.9% data accuracy across legacy and new environments
- Validated data reconciliation and integrity checks between legacy ERP systems & new databases using SQL, Python, Excel
- Performed data quality checks using Python and Excel, reconciling legacy ERP data prior to loading into updated systems

Retail Information Systems

Dec. 2018 - Dec. 2019

Support Technician

Houston, TX

- Provided tier-2 technical support for 15+ retail clients, resolving 90%+ of incidents within SLA across POS systems, databases, and web platforms
- Diagnosed and escalated data integrity, connectivity, and application issues, collaborating with engineering teams to ensure minimal business disruption
- Executed structured troubleshooting workflows, documenting root causes and remediation steps to improve support resolution times

EDUCATION

Texas Tech University

Bachelor of Business Administration in Management Information Systems

Flatiron School Certificate, Sept. 2021 - Feb. 2022

Software Engineering Full Stack Bootcamp
